Fisker Ocean to Make Global Public Debut at CES 2020; Electrify America Revealed As Charging Station Network

- *Fisker Ocean will be seen for the first time in public at Consumer Electronics Show 2020 in Las Vegas: a complete production intent prototype sitting on a fully-engineered platform*
- *Practicality: customers will enjoy access to the largest open DC Fast charging network for EVs in the United States, a free miles package and a frictionless charging experience developed by Fisker and Electrify America; more than 200 miles of range may be delivered from 30 minutes of charging*
- *Unique “California Mode” feature on the world’s most sustainable vehicle will be revealed via video to deposit holders on the Fisker Flexee mobile app next week*

The Fisker Ocean at an Electrify America charging station. The high mounted side indicators double as charge indicators – signaling a full battery when the green light bar is lit to the top.

LOS ANGELES (Dec. 12, 2019) – [Fisker Inc.](#) – designer and manufacturer of the world’s most emotion-stirring, eco-friendly electric vehicles and advanced mobility solutions – is announcing that the Fisker Ocean all-electric luxury SUV will make its public debut at Consumer Electronics Show 2020 in Las Vegas. On the heels of the latest news surrounding the [world’s most sustainable vehicle and reservations opening worldwide](#), Fisker is also revealing its unique partnership with [Electrify America](#), the largest, open DC Fast charging network for EVs in the United States. Drivers will enjoy a frictionless charging experience and more than 200 miles of range from 30 minutes of charging. The two companies are also working together on further reducing charge times without compromising battery life.

Additionally, Fisker Ocean reservation holders will soon have access to an exclusive video that illustrates the vehicle’s unique new “California Mode” open-air feature – via the Fisker Flexee mobile app on the [App Store](#) and [Google Play](#) store.

“I have been eagerly waiting to show our revolutionary Fisker Ocean luxury SUV to the public, so we decided to debut the full prototype – reflecting the actual production vehicle – at CES 2020,” said

Henrik Fisker, chairman and CEO of Fisker Inc. “The world will get to see the fully-engineered vehicle, which rides on a production-ready platform – signaling our intent to get it to market efficiently. I’m also very excited about our partnership with Electrify America, which enables Fisker driver access to the largest open DC Fast charging network in the USA – with approximately 800 charging stations and about 3,500 chargers across 45 states by 2021. Fisker customers will enjoy automatic recognition of the vehicle at Electrify America charging stations, a free miles package from Fisker and the ability to find charging stations through the Fisker Flexee mobile app. Overall, Fisker Ocean will serve as a model for how desirable EVs can replace gasoline vehicles as practical daily drivers.”

"Electrify America is delighted to collaborate with Fisker, a name associated with innovation and design, and the Fisker Ocean is a vehicle that embodies these qualities," said Giovanni Palazzo, president and CEO of Electrify America. "As part of our shared mission to increase electric vehicle adoption, we look forward to offering our network of ultra-fast public chargers to take Fisker customers from coast to coast and advancing e-mobility throughout the United States."

The Fisker Ocean Experience + the Largest Open EV Fast Charging Network in the United States.

Drivers of the world’s most sustainable vehicle will enjoy a truly hassle-free, practical experience when using Electrify America’s extensive charging network across North America through Fisker’s proprietary mobile app.

- Fisker Ocean vehicles will be automatically recognized by Electrify America’s charging stations – allowing for simple charging, automatic release and automatic payments. Fisker will offer a free miles package with each vehicle, allowing for a certain amount of complimentary charging. Additional details on charging packages will be shared later in 2020.
- Electrify America expects to install, or have under development, approximately 800 total charging station sites with about 3,500 chargers by December 2021. During this period, the company will be expanding to 29 metros and 45 states, including two cross-country routes, delivering on its commitment to support increased Zero-Emission Vehicle (ZEV) adoption with a network that is comprehensive, technologically advanced and customer friendly.
- The Fisker Ocean features a CCS Type 2 Combo plug – enabling the vehicle to be charged through any stations that leverage technology in line with the latest in international standards.
- The vehicle is equipped with a state-of-the-art battery – with 80 kWh capacity and a range of up to 300 miles (depending on driving conditions).
- More than 200 miles of range can be delivered from 30 minutes of charging for the Fisker Ocean (15% capacity to 80% capacity). Electrify America’s 350 kW chargers can charge capable vehicles up to 20 miles per minute.

“California Mode.” A Unique, Proprietary Experience Revealed Via the Fisker Flexee App.

- The patent pending “California Mode” feature will be standard on all trim levels, except the base version – allowing passengers to experience the sun, fresh air and an open feeling without being in a convertible.
- Reservation holders will be given an exclusive first look at California Mode. A video will soon be revealed through the Fisker Flexee mobile app next week – painting an early picture of the unique Fisker Ocean brand experience.

The Fisker Ocean is targeted to begin production at the end of 2021 – with the first high-volume deliveries projected for 2022.
